Contents

1	Download	1
1.1	Download as Zip	1
1.2	Download Through CLI git	1
1.2.1	Linux	1
1.2.2	MacOS	1
1.2.3	Microsoft Windows	2
1.2.4	Android	2
1.3	Download Individual Files	2

1 Download

1.1 Download as Zip

In the depository there is a green button that says **Clone or Download**. Clicking on this gives the opportunity to download the files as a zip. Download and unzip in folder of your choosing.

1.2 Download Through CLI git

1.2.1 Linux

Open your terminal and install the git package from your distribution's repository. For example on an Arch based system run the command

sudo pacman -S git. Having made sure that git is installed, run this command to download the files

git clone https://github.com/aa-83/artistic_research.git

1.2.2 MacOS

To install git on you terminal follow these guides first:

- [How to install command line tools](#)
- [How to install Homebrew.](#)

This should not take more than five minutes. When this is done type in your terminal **brew install git** and then

git clone https://github.com/aa-83/artistic_research.git

1.2.3 Microsoft Windows

Description in Progress

1.2.4 Android

Go to the Google Playstore and download the app Termux. Open it and type **pkg install git** and when the instalation is done type

git clone https://github.com/aa-83/artistic_research.git

1.3 Download Individual Files

There is also the option of clicking on the jpg-file and downloading the file from the webpage it leads to. To find the images, open the Images folder.
